The magnetic circuit has a magnetized cylindrical body. When a current is supplied to the vibrating unit, an alternating-current magnetic field is generated by the magnetized cylindrical body. The vibration generating device further includes: a reciprocating unit that reciprocates by the alternating-current magnetic field; and a vibration generating member that is driven by a vibrating unit to reciprocate.Progressive prostate cancer with multiple simultaneous bone metastases using somatostatin analogue. A patient presented with progressive prostate cancer, multiple simultaneous bone metastases, a solitary supraclavicular lymph node and right pleural effusion. He had been using alendronate and risperidone for osteoporosis. Somatostatin analogue lanreotide (SMS 201-995) was injected subcutaneously at a dosage of 30 mg three times daily for 3 months. There was no symptomatic improvement. Significant bone pain decreased significantly after therapy. Bone scintigraphy performed before and after therapy showed progressive disease in the pelvic and rib bones, whereas in the spine, only slight irregularity of uptake had changed. The supraclavicular lymph node improved but was still enlarged. In a case of prostate cancer with multiple simultaneous bone metastases, treatment with SMS 201-995 and alendronate might provide not only symptomatic improvement but also possibly more effective therapy for prevention of skeletal metastasis.Little Inlet Little Inlet, also known as Inlet Cove, is a karst valley in the U.S. state of Virginia. It
